PROFESSIONAL SUMMARY

CCNA-certified network professional with hands-on experience in **routing, VPNs, and Layer 1–3 network troubleshooting**. Experienced supporting enterprise users and deploying **Windows workstations and network infrastructure** while diagnosing **DHCP, DNS, and VLAN connectivity issues**. Built virtualized networking labs using **Proxmox VE, pfSense, and Linux servers**, with infrastructure monitoring using **Prometheus and Grafana**

WORK EXPERIENCE

IT Support Specialist (Technology Peer Mentor) Sept. 2025 – Dec. 2025
Mt. Hood Community College Gresham, OR

- Provided **Tier 1–2 technical support** for 50+ **Windows 10/11 campus workstations**, troubleshooting **DHCP, DNS, and VLAN connectivity issues** to restore reliable network access for faculty and students
- Deployed and configured **Windows workstations**, including **hardware provisioning, OS imaging, driver installation, and network configuration**, ensuring systems complied with campus IT security standards
- Documented **incidents, troubleshooting steps, and network issues** within the **ServiceNow** ticketing system and escalated complex infrastructure problems to senior administrators
- Performed routine **infrastructure health checks**, including **patch verification, network connectivity validation, and hardware diagnostics**, maintaining **99%+ system availability**

CERTIFICATIONS

Cisco Certified Network Associate (CCNA) June 2025
CompTIA Security+ (SY0-701) Dec. 2024
CompTIA A+ (220-1102) Sept. 2025

TECHNICAL PROJECTS

Home Lab Infrastructure & Hybrid Cloud Environment | *Proxmox, pfSense, Entra ID, Grafana* Sept. 2025 - Present

- Built a **bare-metal virtualization environment** using **Proxmox VE** hosting 6+ virtual machines including **Linux servers, Windows Active Directory, and a pfSense firewall**
- Configured **VLAN segmentation, firewall policies, and IPsec VPN connectivity** to secure internal lab networks
- Integrated **on-premises Active Directory with Microsoft Entra ID** to simulate hybrid identity synchronization and centralized authentication
- Implemented infrastructure monitoring using **Prometheus and Grafana dashboards** to track **network latency, packet loss, and service availability**

Network Documentation & IP Address Management Lab | *NetBox, Docker* Dec. 2025 - Present

- Deployed **NetBox using Docker Compose** to manage network inventory and **IP address management (IPAM)**
- Documented **physical and logical network topology**, including device roles, VLAN assignments, and IP allocations
- Replaced manual spreadsheet tracking with **centralized network documentation** to maintain **consistent and up-to-date** network documentation

Enterprise Routing Simulation Lab | *Cisco IOS, OSPF, IPsec, HSRP, EVE-NG* Dec. 2025 - Jan. 2026

- Built a **multi-site enterprise network lab** using **EVE-NG** to simulate branch and core routing environments across multiple **Cisco IOS** routers and switches
- Configured **OSPF dynamic routing and HSRP gateway redundancy** to provide **automatic failover** and maintain network availability
- Implemented **Layer 2 security controls** including **DHCP Snooping, Dynamic ARP Inspection (DAI), and Port Security** to prevent unauthorized device access

TECHNICAL SKILLS

Networking | **VLANs, STP, OSPF, BGP, TCP/IP, Subnetting, IPv4/IPv6, VPNs (IPsec)**, Cisco IOS

Network Operations | **Layer 1–3 Troubleshooting**, Incident Triage, Network Monitoring Concepts, Change Control Systems | Linux (Ubuntu, Debian CLI), Windows Server (AD, DNS), **Proxmox VE**, NAS (NFS/SMB)

Automation | **Python (Netmiko)**, Git, Ansible (lab), **Terraform**

Tools | Wireshark, EVE-NG, NetBox, Grafana, Prometheus, Visio, **ServiceNow**

EDUCATION

Associate Degree in Computer Science Dec. 2025
Mt. Hood Community College Gresham, OR
